

How to set up home security

1. Open up pack and follow instructions on how to set up redboard
<https://www.sparkfun.com/products/retired/13160>
2. Then set up a particle account at <https://login.particle.io/signup>
3. Link redBoard to particle account using <https://www.particle.io/>
4. Create an Ifttt account <https://ifttt.com/join>
5. Use the same link to set up the magnetic door switch sensor
6. To set up for home use, use double sided tape and glue board near a outlet.
7. Peel off tape from magnet sensors
8. Put the side with wires onto the wall and put the other sensor on the door a parallel and half inch from the wall magnet
9. Plug the power supply into outlet using a standard iPhone charger USB adapter
10. In iftt setup a 2 button widgets and a notification or sms ifttt. Then follow instructions here to link particle with ifttt
<https://docs.particle.io/guide/tools-and-features/ifttt/>
